

Tensorboard

Tensorboard is a useful tool to monitor the training process of tensorflow.

Note that `tf.summary` is used in `5_summary.py` to store the loss curves.

You can save all the loggings into summary and visualize the loss curves using tensorboard.

Type the following in terminal

```
tensorboard --logdir=[director to store summary]
```

And then go to the following address in your browser: <http://localhost:6006>

you will see something similar to this:
